

Cybersecurity & Data Privacy

Stay ahead of security threats while improving data privacy, mitigating risk, and optimizing your security investment.

At EXTEND, our professionals and partners are recognized experts in cybersecurity policy, engineering, and operations. We provide concrete solutions to the real threat of information security incidents and breaches. Clients count on our experienced perspective on security challenges and valuable insights into evolving threats to help them understand their critical risks, prepare for cyber threats, create security solutions that prevent cyber attacks and mitigate risks and work with them to successfully respond to incidents if they happen.

We assess your enterprise and third-party vendors, identifying cyber risks and opportunities to improve your security practices. Then, our cybersecurity experts develop and implement a tailored program designed to help you stay ahead of security threats while improving data privacy, mitigating risks, and optimizing your information security investment. If you experience an incident, you can count on EXTEND's experts and partners to help you successfully navigate and quickly resolve the situation.

With EXTEND OnTrack 27001, your information security management system and documentation is managed in the cloud, making it easy for system administrators to securely access and update policies, procedures, assets, and status at any time, from anywhere. In addition, our knowledgeable resources can manage your information security program, as well as your organization's governance, risk management, and compliance requirements, on an ongoing, turnkey basis.

The Value of a Tailored Approach

Every organization is unique, and so are your security requirements. So, aligning your information security program to your business and goals makes good sense.

We take a tailored approach to ISMS design, creating a practical, customized system that's designed to efficiently and effectively meet your security and compliance requirements today and well into the future.

**Everything you need.
Nothing you don't.**

OUR PARTNERS

A leader in cloud-delivered, next-generation endpoint protection, CrowdStrike has revolutionized endpoint protection. CrowdStrike's forensic incident response team accelerates the speed of remediation by providing the most comprehensive view into attacker activity so you can resume business operations faster.

Make your mobile workforce more productive, while keeping your company's data secure – regardless of device. BlackBerry® Work is a better way to mobilize your business, with extended capabilities not otherwise found in native email, calendar, and contacts. Communicate faster, collaborate more effectively, and speed up the pace of decision-making.

A blue downward-pointing chevron shape with the word "Prepare" centered inside in white text.

Prepare

- **Security Review & Assessment:** Perform a 360-degree evaluation of the effectiveness of your current security program, both internal operations and third-party vendors.
- **Incident Planning & Preparation:** Develop comprehensive incident response plans to ensure clients are prepared before an attack or breach takes place.
- **Incident Response Readiness Testing & Planning:** Determine if your security team is prepared for an attack -- from response team readiness and tabletop exercises to communication plans.
- **Security Certification & Compliance:** Attain certification to demonstrate that your security program meets or exceeds ISO 27001 international standards as well as state or industry requirements.
- **Cyber Insurance Coverage Review & Selection:** Evaluate current coverage, environment, risks, and exposure to identify and secure the optimal level of cyber insurance coverage.

A blue downward-pointing chevron shape with the word "Prevent" centered inside in white text.

Prevent

- **Risk Assessment, Treatment & Measurement:** Identify risks in your operation through penetration and vulnerability testing, and maintain a scorecard to measure progress against goals.
- **Security Process Improvement:** Assess response results, strengthen your defenses, and continuously improve your information security program to reduce the impact of an incident.
- **Technology Selection & Implementation:** Deploy solutions that align with your security strategy to support organizational objectives and account for the organization's culture, governance, technology, and structure.
- **Security Policies & Procedures Development:** Enhance your security operations and prepare for certification with processes and protocols based on best practices.
- **Employee Awareness and Training:** Conduct in-depth information security education and assessments designed to improve knowledge, enhance accountability, reduce the risk of human errors, and assess training efficacy.
- **Security Process Integration:** Combine security elements and activities from across the organization to ensure complementary processes that work together in harmony.

A blue downward-pointing chevron shape with the word "Respond" centered inside in white text.

Respond

- **Forensic Incident Review: Investigate, Contain, Eradicate, and Recover:** Identify the source of an incident, eliminate the threat, and monitor for recurring threats.
- **Incident Response Communications:** Meet notification compliance requirements in any jurisdiction and coordinate public relations efforts.
- **Incident Response Legal Services:** Understand and navigate regulatory issues, notification requirements, and public relations best practices in the time-sensitive aftermath of a breach.
- **Case Management:** Perform an organized, collaborative incident response and investigation that delivers useful information and helps mitigate risks.
- **Third-Party Litigation:** Efficiently manage cybersecurity and data breach-related matters with consistently high quality. Disciplined processes and advanced technology enable us to automate repetitive tasks, eliminating wasted hours and reducing overall costs for clients.
- **Coverage Analysis and Litigation:** Evaluate the scope of coverage for resulting losses and costs under cyber insurance policies based on our deep understanding of coverage disputes and experience writing insurance policies.

CYBERSECURITY TECHNOLOGY SOLUTIONS

Web-based and easy to use, EXTEND's OnTrack platform takes the guesswork out of achieving and maintaining ISO 27001 certification. Serving as the one-stop shop to manage the documents, records, and processes required for compliance, OnTrack guides users through the steps to create policies, procedures, and other documentation.

OnTrack's powerful content library of ISO-compliant templates serves as a starting point for comprehensive documentation and can be customized for your unique environment and certification goals. Auditor-friendly views and reports help you demonstrate your controls and documentation, resulting in a smooth, stress-free audit process.

The CrowdStrike Falcon lightweight agent and powerful cloud work seamlessly to deliver real-time protection and visibility, even when the agent is not connected to the internet. CrowdStrike Falcon provides robust threat prevention, leveraging artificial intelligence (AI) and machine learning (ML) with advanced detection and response, and integrated threat intelligence — all through a highly intuitive management console.

- Falcon Prevent: Next Generation Antivirus
- Falcon Insight: Endpoint Detection and Response (EDR)
- Falcon Overwatch: 24x7 Monitoring & Threat Hunting

Forensic Services: Incident Response CrowdStrike identifies and tracks attackers in near-real time, focuses on quickly mitigating their unauthorized access to your environment, and gets your organization back to normal business operations – faster.

Blackberry Work's Mobile Device Management (MDM) helps information technology (IT) administrators manage their mobile devices according to their organization's needs with total visibility, control, and flexibility across a variety of use cases and ownership models.

- Users can enroll their own devices in just moments over Wi-Fi.
- Controls, policies, Virtual Private Network (VPN), wireless network, and Exchange ActiveSync settings will be automatically configured for users.
- Supports the complete device lifecycle.
- Automated process for device role change and decommissioning

Blackberry Workspaces is the leading secure EFSS solution, Blackberry Workspaces allows users to access content anytime, anywhere, and file share inside and outside their organization.
